UPTIME GUARANTEE

Our Objectives

- **Energy Independence**

To deploy high-quality, reliable solar systems to guarantee continuous, clean power.

- **Advanced Security**

To design and install robust CCTV, biometric, and smart security systems to protect homes and businesses.

- **Modern ICT & Power**

To build reliable, future-proof network infrastructure and industrial-grade electrical systems.

"To deliver end-to-end solutions from expert design and professional installation to long-term technical support."

Solar Energy Systems

At Ezton E&E Ltd, we believe energy independence is the cornerstone of a thriving business. Our end-to-end solar energy solutions are engineered to withstand East African conditions, ensuring you harness the maximum potential of the sun. From massive commercial rooftop arrays to reliable community street lighting, we provide uncompromised uptime.

Key System Capabilities

- ✓ High-Capacity Grid-Tied & Hybrid Setups
- ✓ Solar Water Pumping & Irrigation Systems
- ✓ Comprehensive Maintenance & Energy Audits
- ✓ Robust Off-Grid Solutions for Rural Enterprises
- ✓ Heavy-Duty Industrial Power Backup
- ✓ Commercial & Residential Solar Street Lighting

Electrical & Power

Power drives progress. Ezton E&E Ltd ensures your facility is wired for absolute safety and maximum efficiency. Our certified engineers handle everything from high-voltage substation deployments and complex industrial wiring to rapid-response generator troubleshooting—keeping your operations online when it matters most.

Key System Capabilities

- ✓ Complex Industrial Wiring & Layout Design
- ✓ Advanced Switchgear & Control Panels
- ✓ Domestic Wiring and Installation
- ✓ Generator Procurement & Maintenance
- ✓ Power Factor Correction & Diagnostics
- ✓ High-Voltage Line Construction

Security & Surveillance

Security is non-negotiable. Ezton bridges the gap between physical fortification and intelligent tracking. We deploy cutting-edge surveillance technology, ranging from thermal monitoring cameras across massive perimeters to strict biometric access control doors, empowering you with total overwatch.

Key System Capabilities

- ✓ High-Definition IP & Analog CCTV Grids
- ✓ Deterrent Electric Perimeter Fencing
- ✓ 24/7 Global Remote Monitoring Setup
- ✓ Strict Biometric & RFID Access Control
- ✓ Smart Video Door Phones & Intercoms
- ✓ Solar-Powered Autonomous Cameras

ICT & Infrastructure

A modern business lives or dies by its digital backbone. Ezton E&E Ltd designs, installs, and manages scalable ICT infrastructure that ensures flawless data flow. Whether constructing an enterprise-grade server room from the ground up or deploying wide-area wireless networks, we build systems that don't just work—they perform.

Key System Capabilities

- ✓ Enterprise Structured Cabling (LAN/WAN)
- ✓ Wide-Area Wireless Networking Solutions
- ✓ Dedicated IT Consultancy & Support
- ✓ Server Room Architecture & Climate Control
- ✓ PABX & VoIP Communication Systems

Architectural & Construction

Beyond power and connectivity, Ezton E&E Ltd provides complete architectural and construction services. We bridge the gap between structural engineering and aesthetic design, ensuring your facility is not only built to the highest safety standards but integrated seamlessly with modern power and ICT infrastructure from the ground up.

Key System Capabilities

- ✓ Comprehensive Architectural Design & Drafting
- ✓ Interior Space Planning & Finishing
- ✓ Renovation & Structural Fortification
- ✓ Full-Scale Civil Construction
- ✓ Project Management & Site Supervision
